INTRODUCTION

Shiba Inu vs Covid was the answer about a simple question.

What would happen if a cryptocurrency project was 100% run by its community?

While the term DeFi literally includes the word decentralized in its definition, this is in reference to economic status as opposed to its internal hierarchy.

While none of us could have imagined it at the time, this was the start of a revolution.

Projects built on the foundation of community involvement are the untamed wilderness of our future. As we move further away from rigid social structures and traditional mindsets, we become free to discover new ways to solve problems and relate to one another.

In a world ruled by the commodification of time, community-based projects are more than just a change of pace, they are a way to practice the radical acceptance of others. When success depends on the shared strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us. The Shiba Inu vs Covid is our way of recognizing the importance of tearing down a long-established paradigm of a formulaic success and building a path to freedom and creativity in its place.

A community is held together by hundreds, if not thousands, of interconnected moments. It doesn't come from a single perspective, it comes from working together in harmony.

With that thought bright in our minds, we began developing the Shiba Inu vs Covid in earnest.

WHY DECENTRALIZATION?

We are standing at a pivotal moment in innovation.

Until now, centralization has been a prerequisite for all of our official structures. Political, educational, and financial systems are, and have always been, crafted in a way that does not equally and ethically distribute power to those functioning within them. There may have been times in history where this sort of internal configuration played an important role, but, in an age with the information of the world available at the click of a button, it's time to rethink.

2021 updated our eyes to how little control the average person has in the face of these overarching, generational structures when GameStop and AMC stock value exploded seemingly overnight. WallStreetBets tested the waters of what it would look like to disperse control to consumers and inexperienced investors alike.

It was inspiring, but it didn't last long. Just when the movement seemed to be on the brink of success, it was throttled by the bureaucracy of our centralized society. However, not before this concept of a new power among the people took root.

WHY ETH

When comparing different blockchains, you might wonder why we chose to stay on the ETH network. The answer, like the rest of our project, is straightforward and purposeful.

Founder embarked on the journey with a predisposition towards ETH in the first place. It's already secure and well-established, and it truly allows us to stay decentralized.

His top priority was to ensure that his project was free to change and evolve with zero outside regulations impacting it, and ETH was the way to achieve that goal. Our army is able to hold their own tokens in a wallet and collect payments from around the world, all while remaining independent of moderating forces.

WY "SHIBA INU VS COVID"?

Because we are against the spread of Covid.

This is a living document and information is up to date at the time of publishing. Please note information here does not constitute investment advice, financial advice, trading advice, or any other sort of advice and you should not treat any of the content as such. Our team suggests you conduct your own due diligence and consult your financial advisor before making any investment decisions. By purchasing any product, you agree that you are not purchasing a security or investment and you agree to hold the team harmless and not liable for any losses or fees you may incur. You also agree that the team is presenting the products "as is" and is not required to provide any support or services.
